

**McGILL UNIVERSITY Standard Terms and Conditions for Mitacs [Accelerate](#),  
[Accelerate Entrepreneur](#), [Elevate](#) and [Business Strategy Internships](#)**

While Mitacs does not impose an intellectual property policy, McGill has its standard terms and conditions with regards to the various Mitacs programs, as set out in this document.

Companies sponsoring Mitacs programs have consistently expressed an expectation that Project IP arising from such programs will vest with them. To accommodate this expectation, McGill’s terms and conditions provide the Partnering Organization with ownership of the Project IP arising from the internship/fellowship, while granting the intern(s)/fellow(s), Academic Supervisor, and McGill a perpetual, royalty-free license to use that Project IP for non-commercial academic interests. Copyright in any academic publication arising from the Mitacs-funded project is retained by the author of that publication. These terms are the default terms that will apply if the intern/fellow, faculty supervisor, and Partnering Organization does not confirm that an alternative set of terms should apply. Except where there is a separate agreement in place between McGill and the Partnering Organization related to the work to be performed under the Project, these terms shall govern all Mitacs Projects undertaken by McGill **with the exception of Accelerate Entrepreneur projects which are detailed below.**

Partnering Organization, the Intern, and the Academic Supervisor confirm: i) their acceptance of these terms and understand; and ii) that the Project will be governed by these terms.

While it is possible to deviate from these standard terms and conditions, we have found that most Mitacs partnering organizations expect to own the intellectual property developed during the project and any deviation from the standard terms and conditions may result in considerable delays.

If you require any modification to these standard terms and conditions please contact the Office of Industry Partnerships at [innovation\\_partnerships.oip@mcgill.ca](mailto:innovation_partnerships.oip@mcgill.ca) prior to submitting your Application.

All capitalized terms used in this document are defined in **Annex B**.

In the event the Project research results or any data developed in the course of the Project constitute controlled goods under Canadian law, the Parties will cooperate so that the requirements of the law are met prior to disclosure of such results or data. McGill shall have the right to terminate any Project if the disclosure of such information, under license or otherwise, would destroy McGill's ability to invoke the fundamental research exclusion with regard to the conduct or reporting of its research or McGill is unable to comply with the requirements of the Partnering Organization.
